

SCOTUS SCRIPTS

You can send these scripts in a letter or postcard forms to SCOTUS. We recommend you send out postcards due to more economical postage rates and that way you can send many more.

1. On Project 2025

Dear Supreme Court Justices,

I am writing as a concerned citizen alarmed by the implications of **Project 2025**. This blueprint is not about policy — it's about **[insert your concern: erasing rights, consolidating power, silencing dissent, etc.]**.

Please remember, your oath is to the **Constitution**, not to any political agenda.

Signed,

[Name, City, State]

2. On Reproductive Rights

Dear Justices,

The overturning of *Roe v. Wade* has harmed **[insert who: women, girls, survivors, families]** across America. I urge you to reconsider the long-term consequences of denying bodily autonomy.

We will not accept a nation where our **[insert word: wombs, healthcare, futures]** are controlled by the Court.

Respectfully,

[Name]

3. On LGBTQ+ Rights

To the Supreme Court,

I demand full protection for LGBTQ+ rights under the Constitution. Discrimination cloaked in “religious freedom” is still **discrimination**.

My family, friends, and neighbors deserve equal rights, not legal loopholes for hate.

[Name] from [City/State]

4. On the Chevron Doctrine Overturn

Justices,

Your decision to strike down the Chevron doctrine weakens decades of regulatory safeguards. This move benefits **corporate power** at the expense of **public safety**.

I ask you to reconsider future rulings that prioritize profit over people.

— [Name]

● 5. On Trump's Immunity Ruling

Dear Supreme Court,

Your ruling on presidential immunity has set a **dangerous precedent**. No one — not even a former president — should be above the law.

I urge you to restore public faith by upholding the principle of **equal justice**.

Sincerely,

[Name]

● 6. On Gun Safety Laws

Dear Justices,

We are tired of mourning. Children should not fear school, and we should not fear shopping, worship, or living.

I support common-sense gun laws. Your rulings must reflect the urgency of saving lives, not preserving power.

[Name], a grieving and angry citizen

● 7. On Climate Deregulation

To the Court,

The planet is on fire — literally. Your decisions around EPA authority affect **our children's air, water, and survival**.

Please choose science and sustainability over short-term political gain.

From a citizen who cares,

[Name]

● 8. On Voting Rights

Dear Supreme Court,

You've chipped away at the **Voting Rights Act**, and we've watched democracy bleed.

I ask you to defend **free and fair elections**, not enable voter suppression.
Please do not let apathy or partisanship finish what Jim Crow started.
[Name], proud voter from [State]

● 9. On Church and State

Dear Justices,
The line between church and state isn't blurry — it's vital.
Your rulings must reflect the **pluralism** of this country, not one group's ideology.
Theocracy has no place in the land of liberty.
Signed,
[Name]

● 10. On Judicial Ethics

To the Highest Court,
Ethics are not optional. Transparency, accountability, and recusals should be the **bare minimum**.
If you want our trust, earn it.
We are watching. And we will not forget.
— **[Name], one of millions demanding integrity**
